Counteract Balancing Beads

Environmentally friendly Counteract Balancing Beads automatically balance the complete wheel assembly for the life of the tire. Scientifically proven to improve fuel economy, decrease tire wear and virtually eliminate vibration, Counteract Balancing Beads are the faster, smarter and most economical choice to balance wheels.

Counteract Balancing Beads come prepackaged in color coded bags. Vehicle applications range from 1/2 ton suspension and up.

Visit www.howmuchcounteract.com to determine what size bag is needed for your application. Or visit your app store to download the Counteract Balancing Application Calculator App.

Proven to Save Fuel

Counteract is the only tire and complete wheel assembly balancing technology proven to improve fuel economy in two separate **SAE and TMC type II fuel tests.**

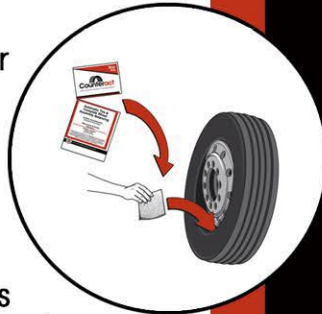

Don't be fooled by false claims or inferior products. Visit www.cbbtests.com to see the tests for yourself.

Installation:

Throw in Method;

Simply tear open the outside bag and inside there is an inner bag containing Counteract Balancing Beads. Simply throw that inner bag inside the tire, the bag will break open and the Counteract will be distributed throughout the tire.

*The Throw in bag application is only recommended for 4oz

and up. For smaller applications you must cut the bag and pour the product into the tire while it is being mounted, or inject it through the valve stem.

Alternatively any size Counteract can easily be injected using the Counteract Injection Pump. Follow instructions included.
